Purpose of Appraisal **Estimated Retail Value**
Function of Appraisal **Comparison**

One electronically tested 18KT white gold ladies cast & assembled tanzanite & diamond pendant with chain. Condition is new, good workmanship. The pendant features a tanzanite set within an elaborate tiered diamond bezel, supported by a lattice under gallery, completed by a diamond cluster bail. The pendant is supported by an eighteen inch length 14KT white gold designer style chain, terminating in a lobster claw clasp. Bright polish finish. Identified with markings of "18K". Containing:

One prong set rectangular step cut natural tanzanite, measuring 15.80 x 12.10 x 7.60mm, approximate weight of 14.66ct., clarity is eye clean, type I, medium dark, strong, violetish blue color, (GIA vB 6/5), cut is good. Transmitting light with no distortion, transparent. Graded in the setting.

Tanzanite is a very rare gemstone that is only found in the country of Tanzania. Originally discovered in 1967. Tiffany & Company, named the stone Tanzanite. It is found in the Usumburu Mountains that border the Umba Valley of northern Tanzania.

Tanzanite occurs in gray, brown, violet, blue, reddish-purple, & green. The gem is interesting because of its exceptional pleochroism. Rotated in different directions a tanzanite will exhibit multiple changes of color. Tanzanite has a low tolerance to ultrasonic cleaning, and should not be cleaned using this method.

Ninety-nine prong set round brilliant & baguette cut diamonds approximate total weight of 99 Stones = 3.18ct. The clarity & color grade reflect the overall average for the group. Graded in the setting.
